

Connecting the Dots

A PEATC Early Childhood Webinar

Early Childhood Hearing Loss

Thursday, May 2nd, 2024 | 6:30 - 7:00 P.M.

Do you know hearing loss can happen at any age and at any stage? Signs and symptoms can be easily overlooked, and it's important children continue to receive hearing monitoring even if they pass their newborn hearing screen. Knowing what to look for helps families act early in getting connected to services and support.

We're Connecting the Dots with parent-advocate and award-winning author **Valerie James Abbott** on common risk factors and signs of childhood hearing loss and how it affects a child's growth and learning.

This webinar will be held on Zoom.
